

Improved Durability AZ150

For more than a quarter of a century GALUZINC has demonstrated its outstanding resistance to atmospheric corrosion. This is the result of the combined action of aluminium and zinc.

ALUMINIUM-ZINC ALLOY COATING

Stands for aluminium and zinc, fused in almost equal proportions to coat the steel sheet with a unique silvery spangle, composed of aluminium (55%), zinc (43.5%) and a touch of silicon (1.5%) to achieve perfect harmony with the steel. The result is a combination of the strength of steel, the protection zinc and the stability of aluminium, GALUZINC is an outstanding product in every way, respecting both the environment and the "natural beauty of steel... forever".
